Projects

■ Project 1: Laravel Framework

Project Title: Hostel Management System

Description: Hostel Management System is designed to revolutionize the way hostels are managed, providing a comprehensive solution for students, managers (hostel wardens), and administrators.

Technologies Used: HTML, CSS, Java script, Laravel.

■ Project 2: Node.js

Project Title: Kashif Travelers

Description: Kashif Traveler is a travel website that offers various types of trip packages for users to explore and enroll in. Additionally, it provides rental packages for cars, hotels, farmhouses, and flats. The admin is responsible for adding the packages, while users can enroll in their preferred options.

Technologies Used: HTML, CSS, JAVASCRIPT, NodeJS.

Contribution: I developed the frontend of admin side and did backend of whole project.

■ Project 3: Laravel

Project Title: Attendance System

Description: Attendance Management is a system designed for teachers to efficiently manage student attendance. Teachers can log in and sign up, add students, and mark their attendance.

Technologies Used: HTML, CSS, Laravel

■ Project 4: Mern Stack

Project Title: Transport Hub

Description: Transport Hub is designed with the primary objective of creating a unified and streamlined platform for managing a variety of services, including car rentals, recreational trip packages, goods shipment, and parcel pickups.

Technologies Used: React, NodeJS, Express JS, MongoDB

Contribution: This is my Final Year Project. I with my two other members are currently working on this project.

■ Project 5: React

Project Title: Portfolio-AneeqaWaheed

Description: This is a website which will include details of my all projects.

Technologies Used: ReactJS

Contribution: I'm Currently working on this.
